

Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Triodos Euro Bond Impact Fund, a sub-fund of Triodos SICAV I, class Z-dis, ISIN: LU0785617936, a UCITS managed by **Triodos Investment Management B.V.**, part of **Triodos Bank N.V.**, www.triodos-im.com. Call +31 (0)30 694 2400 for more information. Autoriteit Financiële Markten (AFM) is responsible for supervising Triodos Investment Management in relation to this Key Information Document. This PRIIP is authorised in Luxembourg. Triodos Investment Management is authorised in the Netherlands and regulated by AFM. Produced on: 02-01-2024.

What is this product?

Type: Triodos Euro Bond Impact Fund is an open-ended sub-fund of a Luxembourg SICAV.

Term: The fund has no maturity date. Triodos Investment Management is not entitled to terminate the fund unilaterally.

Objectives: The fund aims to increase the value of your investment over the medium term, while seeking to maximise positive impact on society and the environment. The fund has sustainable investment as its objective as set out in article 9 SFDR. The fund mainly invests in impact and other corporate bonds whose proceeds must finance projects that contribute to at least one of the following transitions (as defined by Triodos): resource transition, energy transition, food transition, societal transition or wellbeing transition. Issuers that do not meet the Triodos sustainability standards are excluded from investment. Bonds can be issued by corporate bodies or governments. All bonds must be investment grade and denominated in EUR. The return of the fund is determined on the one hand by interest income from investments minus the costs of managing the fund, and on the other hand by

the price changes of the investments. The return of the fund depends to a large extent on interest rate developments. The fund is actively managed. It compares its returns with the iBoxx Euro Corporates Overall Total Return (60%) and iBoxx Euro Eurozone Sovereign 1-10 Total Return (40%), which it does not aim to replicate or outperform. The fund may deviate from the benchmark because it only invests in companies that meet strict sustainability criteria.

Intended retail investor: The fund is available to retail and institutional investors through all distribution channels, with or without advice. The fund may appeal to investors who:

- are looking for an investment combining income and growth that takes a sustainable investing approach;
- are interested in exposure to developed and impact bond markets, either for a core investment or for diversification;
- have a medium risk profile and can tolerate moderate temporary losses.

Orders to buy and sell shares are ordinarily processed on any day that is a banking day in Luxembourg. Capitalisation share classes reinvest the fund's net realised income, while distribution share classes may distribute it.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level. The product may be exposed to risks, such as concentration risk and interest rate risk. This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		EUR 10,000	
Scenarios		If you exit after 1 year	If you exit after 3 years
Stress	<i>What you might get back after costs</i>	EUR 8,270	EUR 8,037
	Average return each year	-17.3%	-7.0%
Unfavourable	<i>What you might get back after costs</i>	EUR 8,270	EUR 8,037
	Average return each year	-17.3%	-7.0%
Moderate	<i>What you might get back after costs</i>	EUR 10,013	EUR 10,286
	Average return each year	0.1%	0.9%
Favourable	<i>What you might get back after costs</i>	EUR 10,928	EUR 11,151
	Average return each year	9.3%	3.7%

This type of scenario occurred for an investment between November 2013 and November 2023. The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Triodos Investment Management is unable to pay out?

As required by law for your protection, the fund's assets are held with a separate company, a depository, so the fund's ability to pay out would not be affected by the insolvency of Triodos Investment Management. If the fund is terminated or wound up, the assets

will be liquidated and you will receive an appropriate share of any proceeds, but you may lose part or all of your investment. Your loss would not be covered by any investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 is invested

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts

	If you exit after 1 year	If you exit after 3 years
Total costs	EUR 69	EUR 214
Annual cost impact*	0.7%	0.7% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.8% before costs and 1.2% after costs.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	EUR 0
Exit costs	We do not charge an exit fee.	EUR 0
Ongoing costs taken each year		
Management fees and other administrative or operating costs	0.65% of the value of your investment per year. This is an estimate based on actual costs over the last year.	EUR 65
Transaction costs	0.04% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments of the product. The actual amount will vary depending on how much we buy and sell.	EUR 4
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	EUR 0

How long should I hold it and can I take money out early?

Recommended holding period: 3 years

Given the nature of the underlying investments of the fund and its objective of sustainable investment, a minimum holding period of 3 years is recommended. In general, the fund will invest in listed, risk-bearing assets that are deemed to be liquid in the short term. Investors must be able to tolerate moderate temporary losses; added value in the fund will be generated over the medium term. Thus, investments in the fund require a medium-term investment

horizon of the investor.

You can redeem your investment daily. No redemption fees or penalties will be charged at the level of the product. Redeeming your investment before the end of the recommended holding period may have a negative impact on the risk or performance of the product.

How can I complain?

If you have a complaint, you can submit it in writing to:

TriodosIM@triodos.com
www.triodos-im.com

Triodos SICAV I
