Triodos Pioneer Impact Fund aims to generate positive impact and competitive financial returns from a concentrated portfolio of small- and mid-cap companies pioneering the transition to a sustainable society.

We select companies for their contribution to our seven sustainable transition themes. Through integrated financial and sustainability analysis we identify the drivers of a company's long-term value creation and assess the impact of ESG materiality on these drivers. Additionally, the companies we invest in must comply with the Triodos minimum standards. This product is not without risks. Please see the prospectus and the KID for more detail.

Highlights

- Triodos Pioneer Impact Fund generated a return (after costs) of -3.73%, while the benchmark yielded 0.04%.
- Equity markets globally started the year how they finished the end of last year, on a positive note. This despite losing some ground on the last day of the month. In euro-terms the gains were even more impressive as the US dollar strengthened versus other currencies. Small- and midcaps lagged their large cap counterparts after a strong rally in November and December.
- The fund had a challenging start of the year. In particular investments in the renewable energy sector like TPI Composites, First Solar, Nordex, SolarEdge and Acciona Renovables were under pressure without specific company news. The reporting season started reassuring, with so far most companies beating expectations and guiding to more growth this year. An example was Acuity Brands, which was the best performing stock this month. Also Gentex, KPN, Corbion and Badger Meter published solid results. The fund's biggest overweights are the sectors Consumer Discretionary and Information Technology. The fund has no exposure to Energy and Real Estate.
